

EASTER EGG SLEEVES

Materials

Easter egg sleeves
Eggs - hardboiled, emptied/blown, or plastic
Spoon, preferably slotted
Medium sized saucepan of water
Hot plate
Scissors

Directions

1. Carefully cut apart the separate designs on the strip with scissors.
2. Insert a hardboiled, emptied or plastic egg into the sleeve, arranging it in the center.
3. Place the egg with the sleeve on a tablespoon, or slotted spoon and dip into boiling water for 3 - 5 seconds until the design shrinks smoothly around the egg. You may need to hold down lighter, emptied eggs in the boiling water to allow the sleeve to "shrink".

Watch a video on how to use the sleeves <http://ow.ly/jcgvZ>

Variations

If using plastic eggs, the finished eggs can be further decorated.
Ribbon can also be attached with a loop to hang the egg.

Easter egg sleeves can be purchased from Multicultural Aged Care.
